

## Crime report

**Date: 8th September 2006**

**Object:** Signalization about serious criminal offenses happened inside the public prosecutor's office of Rome. Hypothesis of crime against the State, and of defamation against public prosecutor's office of Rome. Request for external intervention. Request for an intervention in favor of our protection because of the consequences of suffering.

**Title:** "Case Beatrix"

### Saying first

that inside the public prosecutor's office of Rome located at piazzale Clodio, there has been a subtraction of documents containing signals, *esposti* and crime reports (art.616 of criminal code), which had been presented by who is writing; and noted that such subtraction continues to repeat for whatever new document we deliver, whether it is presented by registered letter, whether it is deposited into the appropriate office of piazzale Clodio.

In all, six (6) registered letters and two *esposti* — personally handed in, of which we keep a copy selfsame to the original one stamped by public prosecutor's office—, have been stolen and/or lost on the premises of the public prosecutor's office.

At the same time local carabinieri refused to accept whatever our *esposto*/crime report. The registered letters, which had been sent to Quirinale, have been later forwarded to Interior Ministry, and from there have been sent to appropriate Prefecture, after they were newly lost.

We succeeded to send only one document to public prosecutor's office. This allowed us to have the prosecutor's assertion concerning the subtraction and/or loss of all preceding documents.

We have tried to send by registered letter to the prosecutor further data of investigation, but also that letter was stolen and/or lost. The proceeding was closed on 3<sup>rd</sup> January 2006, without neither prosecutor nor judge of preliminary investigation took care to have the missing papers, without listening to us, without to give us the possibility to submit other elements, proofs, memorials, without a regular trial, and without fixing the problem, so the subtraction and/or loss had also taken place for the following documents, making impossible to us both to access to a fundamental right granted to citizen, and the submission of other data related to investigation.

### Declaration:

- The legal proceeding opened by Rome's public prosecutor's office has a lot of contradictions and contains objectives and evident mistakes, which make it to be insubstantial just from its foundations, as we explain into the enclosed detail titled "il giuoco delle tre carte".

-In the past we suffered various offenses, we consider the subtraction of documents at public prosecutor's office as an ulterior offense to add to the list of the previous ones we suffered: for all offences we hypothesize the same origin.

- Because of all events happened, listed into numerous *esposti* and/or crime reports we have submitted to Authority since October 2004, we are remained without job, without car, without home, and reduced to poverty. Our town, in which we have the official address, didn't want to take care of our case, and we had to emigrate; still, also in other regions, people who wanted to help us, suffered pressures and intimidations. Our story is told into the enclosed detail titled “*due anni d’inferno in Italia*”.

### **We ask**

a) **That an external public prosecutor’s office** opens an investigation in order to find out the authors of the crime (subtraction). We ask for an investigation about the work of the state prosecutor Mr. \*\*\*\*\* and the judge of preliminary investigation Mr. \*\*\*\*\*, concerning what happened about the proceeding related to the fascicle 49\*\*/\* and to the fascicle 449\*\*/05B. In fact, in the documentations made by prosecutor and by judge there are objective mistakes, and even an obvious misinterpretation, done by judge, of prosecutor’s words. Such errors undermined the basis of the entire proceeding, and make think about a voluntary closure of the case in great haste, behavior that is into the same direction with the will to prevent that magistrature receives whatsoever document (see the enclosed detail titled “*il giuoco delle tre carte*”).

b) We ask to consider what’s happened at Rome’s public prosecutor’s office joined with what’s happened in general to us —facts already described into *esposti* and crime reports which had been submitted and have been subtracted— and we ask to consider that what’s happened to us at Rome’s public prosecutor’s office is the latest action against us made by a mafia’s association adverse to the State.

c) We ask it is managed an action of help and protection; seeing that because of what’s happened, as we described on introduction, and for what we already have fully written inside the subtracted documents and inside the “*Beatrix 2006*” document, we are risking life and we are menaced by the same institutions, which should defend us!

d) We ask to make an action against those crimes we have been unjustly accused, in order to invalidate the contents of our declarations, or because of the loss and/or subtraction of our *esposti* and/or our crime reports, in particular we ask an action about the unlawful entry made described into our crime report of February 2005, in which we asked an action in order to take again possession of our goods and in order to be in position to manage the activities of our company.

### **Two words about our life.**

Into the enclosed papers “*due anni d’inferno in Italia*” we explain with more details how we have lived. Now, we want to highlight the thing that worried us more than any other, that is, the intimidations received from members of police of the local station, started in March 2005, but other intimidations have also taken place outside the region, in Lombardy.

We have received menaces from a police force, and refusal to accept our crime reports and *esposti*. Our municipality refused to help us. As soon as we move into another municipality and we ask help, police force comes back with intimidating actions, or it begins defamations against us, which prevent to get a new life. These problems have come out after we have left our birthplace, and we have closed with our families, because there were dirty circulations of money, cults with the dead and political plots and plots into the

football world's. Problems are largely manifested when we made public some important information about the historic heritage of C\*\*\*\*\*, fraction of B\*\*\*\* (PD) where there are large installation of illegal antennas and quarries in service. Since that moment it has been a hell, it was set fire all around us.

There have been intimidations, unlawful domicile entries, defamations. First we have lost the job, then the car, and finally home. Our requests of help and crime reports have got lost all even if we had tried different ways (public prosecutor's office, President of Italian Republic). We are emigrated, but a few time later the same stories emerged.

How can we live in Italy if there are some powerful people who interfere so heavily with our life? We can't make a step, in whatever place of Italy, that this power ruins our life. We are like sons of mafia members, we have made the choice to have no longer contacts with that world, we are considered like traitors, and therefore we had to pay in an exemplary manner, as a lesson to all those people who want to escape from this large human's Despair.

**It would be easy to think that at the end, these are only our own facts, letting documentation to disappear or not carrying out to one own responsibility. In this situation it will never be freedom again, if people don't stop what's happening, even for people who believe to be protected by these powers. At this point it seems that the entire Italy has become like a vast Sicily.**

Therefore, we ask you help, we ask aid to the Italian State and to its Institutions again.

If there isn't place for us in Italy, eventually you can help us to go abroad.

Or anyhow, if you cannot guarantee justice, because the historic moment in which we are living is critical, at least you can help us to live: we ask the possibility to work and to live.
